

Landscape greening supplies

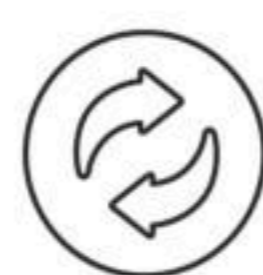

eel plate planting box

Product advantages

Galvanized Steel Material

Eco-friendly & Safe

Easy to Assemble & Disassemble

rust prevention

- **Extra durable against wear & corrosion**
Sturdy metal features outstanding weather resistance, anti-rust and anti-corrosion performance for long service life in regular outdoor environments.
- **Flexible assembly with great compatibility**
Modular splicing design allows fast assembly with basic tools; easy to move or adjust garden layout.
- **Eco-safe for worry-free planting**
The galvanized steel contains no toxic substances that leach into soil, safe to grow edible plants.
- **Versatile stylish look & low maintenance**
Curved thickened edge prevents cuts; corrugated surface delivers elegant modern appearance.

“

Material: Galvanized steel sheet

Color: Silver gray

Product Features: Rust & corrosion resistant, modular splicing structure

Available in multiple shapes, durable for long-term use

Application Scope: Rooftop garden, household balcony vegetable planting, courtyard flower cultivation, municipal landscape construction, etc.

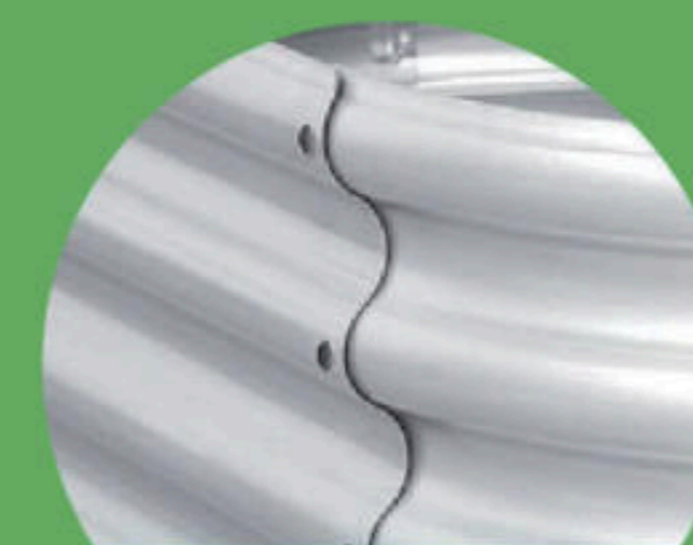

Ideal for growing vegetables, fruits, flowers, foliage plants and other crops.

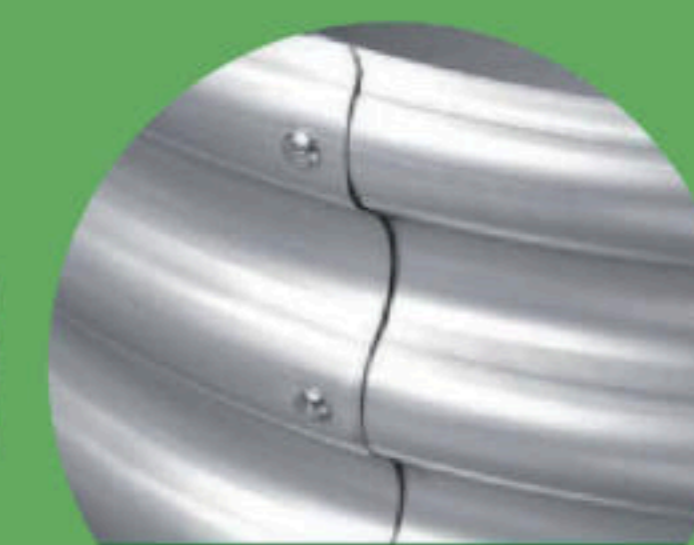

physical object image

long	wide	high
60cm	60cm	28cm
90cm	60cm	28cm
